

CIVIC PARK

PENDLE HILL

STAGE 1

Wetland Revitalisation

Works include technical and visual improvements to provide an improved wetland environment. This is easier for Council to maintain and provides an improved address to the park edge which has high visual appeal.

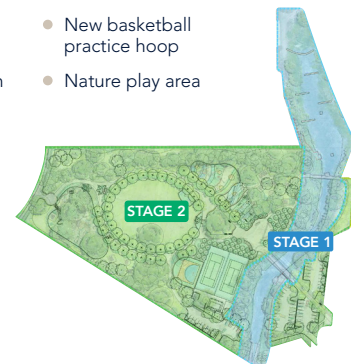

- Removal of existing reed beds and introduction of native aquatic planting in open water zones.
- Terraced embankments to improve wetland edge stabilisation and assists with plant establishment at the waters edge.
- Use of gross pollutant traps/trash collection points
- New bridge with updated design and improved connections through the car park to the town centre.
- Improved design of the sediment zone to make it easier to de-water for sedimentation removal and provide improved access for machinery for maintenance.

STAGE 2

Civic Park Upgrade

This much loved park receives a very welcome restructure and refresh. Valued elements are retained and worked around, with an updated layout, new facilities and new areas to play, meet, gather, be active or just rest.

- A central village green, which can cater for community events
- Civic gathering space
- Play equipment, fitness gym and table tennis area.
- A second bridge to create a wetland walking loop and provide an alternative crossing point while events are on at Civic gathering space
- Improved parking facilities
- Picnic tables for a variety of groups sizes
- New basketball practice hoop
- Nature play area

LEGEND
